EDUCATION	Pohang University of Science and Technology (POSTECH) B.S. in Electrical Engineering, GPA : 3.39/4.3 • Specialization in Embedded Systems • Founded a deep-tech startup	Pohang, Korea Feb '19 - Jan '27 (exp.)
	University of California, Berkeley Exchange Student in L&S • Focus on Mathematical Logic and Entrepreneurship	Berkeley, CA Jan '25 - May '25
SCHOLARSHIPS	Presidential Science Scholarship ('21 - Present) POSTECH EE Study Abroad Scholarship ('25) POSTECH Jigok Full-Tuition Scholarship ('19 - '20)	
HONORS AND AWARDS	Talent Award of Korea 2025 Proud POSTECHIAN with Highest Honor CES Innovation Award Honoree : Youngest Korean honoree at CES (link) KIC DC I-Corps Global Startup Challenge, Top 10 Undergraduate Research Program, Excellence Award Convergence Civilizations Renaissance Production Winner	'25 '24 '23 '21 '20 '20, '21
WORKING EXPERIENCE	Lutra Inc. Founder & CEO • Built and deployed AI/blockchain data-integrity systems for 40+ enterprise clients, owning full-stack design from embedded hardware to backend; reached first fiscal surplus in 1Q '26. • Led three government-funded R&D projects; selected for Google for Startups and OpenAI for Startups; CES Innovation Award (2023). Hyundai Motor Company (HQ) ML Intern • Developed time-series ML models (RNN, Transformer) to predict EV driving range and analyzed prediction error to identify its sources. • Conducted field tests on production EVs to validate sensor data, and identified the vehicle features most strongly correlated with energy-consumption variance. ROBOTIS Robotics Prototyping Intern	Sep '21 - Present Jun '21 - Sep '21 Jun '20 - Aug '20
SELECTED PROJECTS	[1] Mathematical Logic Study (UC Berkeley & POSTECH, 2026) • Coursework by Patrick Lutz; study supervised by Sungmoon Cho (POSTECH). • Wrote a 100+ page study note covering Propositional Logic to Model Theory. • Organizing an open-access lecture series for Korean students (exp. Summer 2026).	

[2] EV Driving Range Algorithm Optimization (Hyundai Motor Company, 2021)

- Found that prediction error originated mainly from a few sensor features rather than model capacity, by comparing RNN and Transformer architectures.
- Identified that range anxiety stems from UX gaps rather than algorithmic limits, and proposed data-driven UX improvements accordingly.

[3] Facial Feature & Personality Correlation Analysis (POSTECH, 2021)

- Developed an MBTI prediction model based on facial feature recognition with a 76% accuracy rate.
- Trained ML models on 2,000 individuals datasets to analyze statistical correlations.
- Awarded in the Undergraduate Research Program.

[4] Autonomous Telepresence Robot (POSTECH, 2020)

- Developed autonomous telepresence robots featuring real-time video streaming and remote navigation via ROS.
- Implemented SLAM using dual LiDAR and tracking cameras.
- Evaluated for a remote real-estate viewing application in collaboration with Zigbang.

[5] Election Information App for First-Time Voters (Individual, 2020)

- Developed a web platform to encourage political participation and voter turnout among 20-year-olds.
- Featured in nationwide media, including KBS and MBC radio interviews and 20+ news articles.

EXTRA
CURRICULARS

Global Student Startup Competition – Director of Relations ('25, '26)

- Co-directed a global competition under the Asian Leadership Conference (ALC), uniting student founders from 16 universities (incl. Harvard, Stanford, Oxford).

Early Stage Startup Mentorship ('23 - Present)

- Mentor | UC Berkeley BMoE Bootcamp '26 August
- Mentor | TeX-Corps (Korea I-Corps, MSIT) Lab-to-Market Program
- Speaker | KIA-sponsored Pangyo Youth Pathfinding Program (3 years)
- Speaker | Mentorship sessions at public schools and universities

Election Information App for First-Time Voters('20)

- Built an app aggregating election commission data for first-time voters to compare party platforms and locate districts; 4,800+ users in 3 days, covered by KBS, MBC, and 20+ outlets.

POSTECH Orchestra club 'HanUIRim' President ('20)

- Implemented a contactless recording ensemble.

POSTECH Landmark Photo Competition Winner ('20)

- A work called 'Night of Engineering Building' was elected through online voting.

SKILLS

Languages: Python, C, C++, JavaScript
ML/AI: PyTorch, Stable Diffusion (LoRA, ControlNet), LLM APIs
Platforms: Ubuntu, ROS, Arduino, Raspberry Pi
Tools: Fusion 360, LaTeX, Premiere Pro, 3D Printing

VOLUNTEERS

Volunteering at the Seoul National School for the Blind (Feb, 2024 - Aug 2024)

- While developing a service to improve disability access on a website, I began volunteering with the blind community and have taught every other week since 2024.

Online educational giving by college students (Nov, 2020)

- To make coding easier to understand, we created and distributed a YouTube video on how to create a homepage from HTML to JavaScript

Vision in Calling, VIC Project (Sep, 2019 - Sep, 2020)

- Through the "10 Projects Changing the World," this is part of a project to enhance the problem-finding, problem-solving, and creative convergence capabilities of high school students living in the era of the Fourth Industrial Revolution.
